PROFESSIONAL SUMMARY

Second-year B.Tech CSE (AI/ML) student at BVRIT Narsapur with hands-on experience building Python applications, document-processing tools, dashboards, and AI/ML projects. Built and deployed projects including an AI Resume Analyzer and OCR Document Extraction System. Seeking a Python Developer internship to contribute clean, reliable code while learning in a real engineering environment.

TECHNICAL SKILLS

- Programming: Python, OOP basics, CLI applications, input validation, exception handling
- Backend & Workflow: REST APIs, requests, python-dotenv, logging, validation, modular workflow design
- AI/ML & Data: Machine Learning, NLP, semantic matching, feature engineering, OCR, image processing
- Libraries & Tools: Scikit-learn, Pandas, NumPy, PyPDF2, OpenCV, Tesseract OCR, Streamlit, Git, GitHub

PROJECTS

AI Resume Analyzer 2025

Python, Streamlit, Scikit-learn, PyPDF2, NLP

- Built and deployed a Streamlit app that compares resumes against job descriptions and returns a job-fit score.
- Extracted and cleaned text from PDF resumes using PyPDF2, with handling for document parsing edge cases.
- Implemented NLP-based semantic skill matching to identify matched skills, missing skills, and recommendations.

AI Document Extraction System (doc-ai-ocr) 2025

Python, OpenCV, Tesseract OCR, image preprocessing

- Developed an OCR pipeline to extract structured text from scanned documents and images.
- Used OpenCV preprocessing such as binarization, noise removal, and deskewing to improve OCR quality.
- Produced clean machine-readable extraction output for downstream analysis and processing workflows.

EDUCATION

B.Tech - Computer Science & Engineering (AI/ML), BV Raju Institute of Technology (BVRIT), Narsapur Sep 2024 - Apr 2028

Second-year student specializing in Artificial Intelligence and Machine Learning; building practical Python and AI projects alongside coursework.

CERTIFICATION

LinkedIn Learning - Career Essentials in Generative AI (Issued 2024)
